MORE SUPPORT HIGHER PROFIT

Because every customer's needs are different, every Netafim system and service is tailored to individual requirements. Whether you require an advanced turnkey project or an upgrade of your existing facilities we can provide a one-stop shop for everything you need.

+50°C

ADAPTED TO EVERY CLIMATE CONDITION

With the right greenhouse infrastructure in place, it can be 150kph winds and horizontal rain outside while inside roses bloom.

Our technology gives you control over your climate, which means control over your profit.
